

## Emethy's® **Amino**

Amino Acid Formula

A neuron can reset itself **400 times a second** when given the right form of Amino Acids.

### *Jump Starting Brain Cells*

**Treating addictions with restorative amino acids began with Dr. William Hitt, an immunologist, who had been studying the effects of nutrition on cells in tissue cultures.**

Dr. Hitt found that by recharging neuro brain transmitters, using Amino Acids, resulted in **jump starting activities of the brain.**

Thus Emethy's® Amino formula was born. **Amino** is designed to enhance and reset damaged brain receptors.

**Amino resets neuro brain transmitters and helps to erase old negative tendencies.**

**Amino can also help rebuild damaged brain cells due to traumatic blows to the head, strokes and unclear thinking.**

**Amino Acids are the chemical units or "building blocks" of the body that make up proteins. Protein substances make up the muscles, tendons, organs, glands, nails, and hair. Growth, repair and maintenance of all cells are dependent upon them.**

### **The Science Behind Amino Acids**

#### **The RDS Gene**

The RDS gene was discovered by Dr. Kenneth Blum. Through his research he found that About 1/3 of the US population suffers with a condition that he called **Reward Deficiency Syndrome** or RDS.

#### **The Human Brain Connection**

The human brain produces a number of "feel good" chemicals. When levels of these "feel good" chemicals are low or blocked from the brain's receptors, **pain, discomfort, addictions and agitation are the result.**

#### **Genetics May Be Creating Your Unwanted Behavior**

People who have these genetic variants possess the inability to produce "**feel good**" chemicals in the brain.

**They are unable to produce a feeling of well-being and consequently self-medicate with substances that help raise the levels of "feel good" chemicals in their system, if only temporarily.**

**These substances often include:** carbohydrates (sugar), junk food, alcohol, nicotine, narcotics or thrill-seeking behaviors such as gambling, sex and emotional addictions. Unfortunately, these things can only provide **short term relief.**

Amino Acids bathe and repair these damaged brain cells.

#### **A WISE ONES WORDS:**

**ADDICTS ARE ONLY POSTPONING THE DAY OF RECKONING.**

Amino may be the answer to **permanently** making that change.
