

# Emethy's® OXY

How it should work.....

**OXY** Helps to get more oxygen into your system and out of the air you breathe. Oxygen is known to attack free radicals and infectious anaerobic bacteria, parasites, microbes and viruses. Hostile microbes, anaerobic bacteria and viruses are unable to survive in the presence of oxygen. Oxygen is a powerful free radical scavenger. Any stress ~ whether caused by infections, toxic chemicals, emotions or physical trauma, results in an increase of free radicals.

**Oxy** can dramatically increase Oxygen levels to your cells and:

- **Increased Cellular Oxygenation and revitalization**
- **Support for Increased cellular respiration**
- **Overall metabolic catalyst and energy booster**
- **Assistance with production of ATP (adenosine triphosphate)**
- **Anti-Oxidant properties**
- **Delivery of essential Ionic minerals**

**Synopsis:** One of the greatest hazards to our health is related to the decreasing levels of vital elements in our environment. Soils around the planet have been depleted of essential minerals and oxygen levels in our atmosphere have reached a dangerously low level. These deficiencies can be a significant factor in the development of many health issues as well as zapping our energy levels.

Emethys® **Oxy** is an advanced formula that enhances oxygen uptake and mineral replenishment. **Oxy** combines minerals and rich oxygen in a Fulvic base to oxygenate and revitalize your cells. **Emethy's unique delivery system allows** electrons to create a high spin state, which makes Emethy's® **OXY** a super conductor of electricity.

**OXY** is a **LIFELONG** formula- Price \$100.00
