

EMETHY'S® ReLiv

Unlike other anti-inflammatory

ReLiv is a formula that targets the root cause of pain, providing effective and sustained relief. By inhibiting cellular damage, curbing inflammation, relaxing tension and increasing the cells' ability to absorb important hormones, **ReLiv** can bring results far beyond any expectations.

Beyond pain relief! **ReLiv** behaves quite differently from the usual anti-inflammatories. Think of it not only as effective pain relief, but also an **education** for your body's cells.

ReLiv teaches your cells to respond better to the cause and action of inflammation- the ability our cells lose as we age and/or when inflammation is ongoing. **ReLiv** creates a positive response, no matter how long the inflammatory condition has existed. With **ReLiv** your cells are relearning how to protect and reinvent themselves, this results in rehabilitation and prolonged pain relief.

ReLiv= Teaching our cells to revive & relive.
