

## EMETHY'S® YOUTH

Emethy's® YOUTH encourages the pituitary gland to safely release its own human growth hormone (HGH) similar to that of people in their mid-twenties. With YOUTH you can slow, stop and even reverse many of the signs of aging.

YOUTH binds to your cells, signaling them to clean away accumulated waste and begin the repair and replacement process in aging and damaged cells.

Notable benefits from improved HGH levels via YOUTH include:

- \*Strengthened immune system
- \*Improved outlook and enhanced mood
- \*Acceleration in hair growth and reduction of graying
- \*Diminished or eliminated cellulite
- \*Skin firming
- \*Improved sleep
- \*Loss of fat
- \*Restoration of deep and restful sleep
- \*Increase in muscle mass
